Roadster, Sports, Sports Tourer, SuperMoto, Trail

The dual-compound sport tyre designed for sporty use combines grip on dry and wet surfaces, and power around the curves.

Grip and maneuverability

Power around the curves

Sporty performance

All-season

## Key benefits

### Michelin always aims to bring together multiple performances.

At MICHELIN, we never work on one isolated element of performance. Instead, we focus on the whole package: safety, durability and the thrill of riding... all at the same time and with no trade-offs. That's what we mean by MICHELIN® Total Performance™, which has and will always be our difference on every tyre.

### Grip and maneuverability

The MICHELIN Pilot Power 2CT is designed for enjoying sporty style riding. It satisfies riders' demands by combining excellent grip on both wet and dry surfaces as well as an optimized service life.

### MICHELIN 2CT dual-compound technology

A tyre that's resistant in the middle and tender on the edges, allowing it a maximum lean angle of 51.2°, is an unprecedented feat for a tyre designed for the road. Thanks to its 2CT dual-compound technology, this is just an example of the MICHELIN Pilot Power 2CT's performance capabilities.

### A tyre designed for sporty use

Designed to last on long trips without ever cutting corners, the MICHELIN Pilot Power 2CT withstands the aggression of accelerations and doesn't flinch at harsh braking.
